

AGME Booking Application Sprint Review Notes

Team No. 3

Sprint: 2

Date: 21st September

Attended: Kajal, Luke, Cass, Chris and Kevin

Scrum Master: Kajal Soni

Product Owner: Christian Adriano

Development team: Luke Harris, Cass Ilangantileke, Kevin Nguyen, Kajal Soni and Christian Adriano

1. Goal

In this sprint it was imperative that we completed tasks leftover from the previous sprint, fully finalising them and then undertaking a new task (sign-up) and deploying under AWS/integrating via circleCI. We also decided to begin a bookings history however decided that fully completing this task was not feasible.

2. Estimated vs Completed

Of the six main tasks outlined in this sprint, five were completed to an agreed-upon standard which leaves the relevant stories/criteria satisfied. Admin login functionality experienced some issues and was pushed into the next sprint due to it's lower priority and it was decided it is not feasible to be completed in time for the sprint

Complete: User story 2, 3, 5, 10, 18

Incomplete: 9

3. Current status of system

1. Customer and Worker Signup

No particular known issues at this time, completion of admin login and dashboards prioritised for next sprint

5. Burndown

Burndown Chart: Data

Day	Estimated Burndown	Actual Burndown
11	33	33
12	30	29
13	27	27
14	24	25
15	21	20
16	18	20
17	15	16
18	12	11
19	9	5
20	6	5
21	3	3
22	0	0

Work progressed at a satisfactory rate, progress had halted slightly due to group members needing time for other work/circumstances, however a breakthrough was made quickly afterward allowing work to progress at a comfortable pace
