

August 28, 2020

luke 08/28/2020
hey, are we meeting?

Kajal 08/28/2020
im ready

Kevin 08/28/2020
yeah same

Chris 08/28/2020
need 5 min
sorry

Kajal 08/28/2020
all g

Chris 08/28/2020
okay i'm good when you guys are

Cass 09/04/2020
We meeting today at 5.30?

luke 09/04/2020
Hey, i've pushed the bookings api on feature-bookings branch, haven't done much testing yet or written any unit tests so there is probably some errors at the moment
The same type of unit tests that we wrote for the other api's can also be written for the bookings so feel free to make a start on that if you want

Kajal 09/04/2020
Cool! Thanks Luke

5:03 PM

I'll try and get a start of those test this week
Meeting at 5:30 yeah?

luke 09/04/2020
im free at 5:30

Chris 09/04/2020
i'm good this time

Kajal 09/04/2020
<https://github.com/RMIT-SEPT/majorproject-7-tues-14-30-3/commit/3a68c44824a240c4a8cb31576a187a5f7b2ed409>

 **Cass** 09/06/2020
i'll take a look at it as well, see what we can do
so are we gonna meet?

 **Kajal** 09/06/2020
should we complete sprint retro for sprint 1

 **Chris** 09/06/2020
suppose so

 **Cass** 09/06/2020
hey luke just a recap:

Kajal is working on finishing the burndown chart and retro (and she's gonna look into connecting BackEnd with FrontEnd)
Chris is working on writing some unit tests for booking
I'm gonna try and do some unit testing for react

think thats it, someone feel free to add something if I missed any

 **luke** 09/06/2020
Thanks, ill send through that postman sample requests through in a bit
Its important that the unit tests import the correct test annotation. If a test isnt working check the exact import the others are using, alough it could just be that my code is broken
And that the test should be failing

 **Chris** 09/06/2020
luke when i try to run our old unit tests this is happening do you know anything about it?

September 14, 2020

 **Kajal** 09/14/2020
yeah same here

 **Cass** 09/14/2020
So, 11.30?
 1

 **luke** 09/14/2020
i got a class until 12:30

 **Cass** 09/14/2020
I can do 12:30 as well
gives Chris another hour of sleep
 2
plus I figured out my issue with integration from the tute today so I might be able to get it done now

 **Kajal** 09/14/2020
12:30 sounds gd
what issue?

 **Cass** 09/14/2020
why it wasnt sending requests to the backend

Cass 09/14/2020
YESSSSSSSSSSSSSS

Run | Run Selected | Auto complete | Clear | SQL statement:

```
SELECT * FROM ACCOUNT;
```

ID	ADDRESS	CREATED_AT	EMAIL	FIRST_NAME	LAST_NAME	MODIFIED_AT	PASSWORD
1	7 street eujee	2020-09-14 11:36:42.292	blah@blah.com	tefefefe	tefefefe	null	password

(1 row, 11 ms)

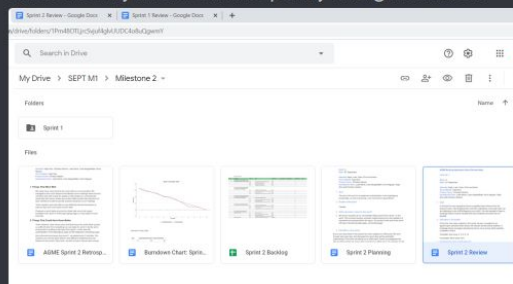

luke 09/14/2020
Awesome!!!!!!

Kajal 09/14/2020
Yay!!!!

Cass 09/14/2020
finally
gawd that was sooooo annoying
I'll have to redo from scratch tho I messed up kevin's code, like a lot to try and figure this out
I can even connect a booking form to the backend if thats done

September 22, 2020

Chris Today at 2:06 AM
okayyyyyy sorry for messaging at 2am but i wrote placeholder sprint reviews, if anyone can think of stuff to add please do and most importantly sprint reviews require some sort of demonstration (screenshots) of the product at that time so if someone could provide those it'd be awesome thaaaaaanks-
i'm tired. sorry if i don't wake up early enough tomorrow

Cass Today at 9:15 AM
Sweet good job! I might be able to grab some screenshots thanks to us working separate features on branches. I'll look into that
Is everyone okay with starting a meeting at 1.30 ish? Or is that too early

Cass Today at 10:52 AM
uhm, I've been following the sprint backlog to get the screenshots and it says admin login and signup lol we never actually did that, but I can do it, should be super easy
oh nvm, the admin account on the back end isnt defined yet
